

## Author Index\*, QIC Vol.1 (2001)

A-G	H-M	N-Z
<p>G. Alber, <i>Optimal two-particle entanglement by universal quantum processes</i>, (3) 33</p> <p>P. Aravind, <i>Optimal quantum measurements for spin-1 and spin-3/2 particles</i>, (3) 52</p> <p>M. Armen, see H. Mabuchi</p> <p>D. Bacon, see J. Kempe</p> <p>C. Barnes, <i>Quantum computation using electrons trapped by surface acoustic waves</i>, (s) 96</p> <p>A. Ben-Kish, see D. Kielpinski</p> <p>T. Beth, see R. Steinwandt</p> <p>S. Braunstein, see P. Echternach</p> <p>G. Brennen, see P. Jessen</p> <p>R. Brenner, see A. Dzurak</p> <p>J. Britton, see D. Kielpinski</p> <p>T. Buehler, see A. Dzurak</p> <p>N. Cerf, see P. Kok (II)</p> <p>K. Cheung, <i>Decomposing finite Abelian groups</i>, (3) 26</p> <p>I. Chuang, see L. Vandersypen</p> <p>I. Cirac, see G. Giedke</p> <p>R. Clark, see A. Dzurak</p> <p>N. Curson, see A. Dzurak</p> <p>A. Delgado, see G. Alber</p> <p>I. Deutsch, see P. Jessen</p> <p>D. DiVincenzo (I), book review on "Quantum Computation &amp; Quantum Information" (Nielsen &amp; Chuang), (2) 95</p> <p>D. DiVincenzo (II), <i>Dogma and heresy in quantum computing</i>, (s) 1</p> <p>D. DiVincenzo (III), see J. Kempe</p> <p>J. Dowling (I), see P. Kok (II)</p> <p>J. Dowling (II), see P. Echternach</p> <p>L-M Duan, see G. Giedke</p> <p>S. Dultz, see P. Echternach</p> <p>M. Dykman, <i>Quantum computing with electrons floating on liquid helium</i>, (s) 102</p> <p>A. Dzurak, <i>Construction of a silicon-based solid state quantum computer</i>, (s) 82</p> <p>P. Echternach, <i>Universal quantum gates for single cooper pair box based quantum computing</i>, (s) 143</p> <p>S. van Enk, see H. Mabuchi</p> <p>E. Gauja, see A. Dzurak</p> <p>G. Giedke, <i>Distillability criterion for all bipartite Gaussian states</i>, (3) 79</p> <p>J. Goldman, see T. Ladd</p> <p>J. Goodkind, <i>Fabrication of the structure for qubits using electrons on liquid helium</i>, (s) 108</p>	<p>A. Hamilton, see A. Dzurak</p> <p>D. Haycock, see P. Jessen</p> <p>M. Horodecki (I), <i>Entanglement measures</i>, (1) 3</p> <p>M. Horodecki (II), <i>Classical capacity of a noiseless quantum channel assisted by noisy entanglement</i>, (3) 70</p> <p>P. Horodecki (I), <i>Distillation and bound entanglement</i>, (1) 45</p> <p>P. Horodecki (II), see M. Horodecki (II)</p> <p>R. Horodecki (I), see P. Horodecki (I)</p> <p>R. Horodecki (II), see M. Horodecki (II)</p> <p>W. Itano, see D. Kielpinski</p> <p>D. Janzing, see R. Steinwandt</p> <p>P. Jessen, <i>Quantum control and information processing in optical lattices</i>, (s) 20</p> <p>I. Jex, see G. Alber</p> <p>J. Kempe, <i>Encoded universality from a single physical interaction</i>, (s) 33</p> <p>D. Kielpinski, <i>Recent results in trapped-ion quantum computing at NIST</i>, (s) 113</p> <p>H. Kimble, see H. Mabuchi</p> <p>G. Klose, see P. Jessen</p> <p>E. Knill, see G. Milburn (II)</p> <p>P. Kok (I), <i>Webcorner</i>, (1) 94</p> <p>P. Kok (II), <i>Long-distance quantum communication just around the corner?</i> (3) 87</p> <p>P. Kok (III), <i>Webcorner update</i>, (3) 91</p> <p>T.D. Ladd, <i>Solid-state crystal lattice NMR quantum computation</i>, (s) 56</p> <p>R. Laflamme, see G. Milburn (II)</p> <p>H. Lee, see P. Kok (II)</p> <p>D. Leung, see M. Horodecki (II)</p> <p>B. Lev, see H. Mabuchi</p> <p>H-K Lo, <i>Proof of unconditional security of six-state quantum key distribution scheme</i>, (2) 81</p> <p>M. Loncar, see H. Mabuchi</p> <p>H. Mabuchi, <i>Quantum networks based on cavity QED</i>, (s) 7</p> <p>R. McKinnon, see A. Dzurak</p> <p>V. Meyer, see D. Kielpinski</p> <p>G. Milburn (I), book review on "The Physics of Quantum Information: Quantum Cryptography, Quantum Teleportation, Quantum Computation" (eds. D Bouwmeester, A Ekert &amp; A Zeilinger), (3) 89</p> <p>G. Milburn (II), <i>Efficient linear optics quantum computation</i>, (s) 13</p> <p>M. Mitic, see A. Dzurak</p> <p>C. Monroe, see D. Kielpinski</p> <p>M. Mosca, see K. Cheung</p>	<p>Y. Nakamura, see J. Tsai</p> <p>M. Nielsen, <i>Majorization and Interconversion of bipartite states</i>, (1) 76</p> <p>J. O'Brien, see A. Dzurak</p> <p>L. Oberbeck, see A. Dzurak</p> <p>Yu. Pashkin, see J. Tsai</p> <p>S. Pilla, see J. Goodkind</p> <p>P. Platzman, see M. Dykman</p> <p>J. Preskill, see H. Mabuchi</p> <p>T. Ralph, see G. Milburn (II)</p> <p>D. Reilly, see A. Dzurak</p> <p>A. Robinson, see C. Barnes</p> <p>M. Roukes, see H. Mabuchi</p> <p>M. Rowe, see D. Kielpinski</p> <p>C. Sackett (I), <i>Quantum information experiments with trapped ions: status &amp; prospects</i>, (2) 57</p> <p>C. Sackett (II), see D. Kielpinski</p> <p>A. Scherer, see H. Mabuchi</p> <p>S. Schofield, see A. Dzurak</p> <p>T-C Shen, see J. Tucker</p> <p>J. Shilton, see C. Barnes</p> <p>M. Simmons, see A. Dzurak</p> <p>G. Smith, see P. Jessen</p> <p>F. Stanley, see A. Dzurak</p> <p>R. Steinwandt, <i>On using quantum protocols to detect traffic analysis</i>, (3) 62</p> <p>B. Terhal, see M. Horodecki (II)</p> <p>W. Tittel, <i>Photonic entanglement for fundamental tests &amp; quantum communication</i>, (2) 3</p> <p>J. Tsai, <i>Qubit utilizing charge-number state in super conducting nanostructure</i>, (s) 124</p> <p>J. Tucker, <i>Fabricating an all-epitaxial silicon quantum computer</i>, (s) 129</p> <p>L. Vandersypen, <i>NMR quantum computing -- lessons for the future</i>, (s) 134</p> <p>G. Vidal, see M. Nielsen</p> <p>J. Vuckovic, see H. Mabuchi</p> <p>G. Weihs, see W. Tittel</p> <p>R. Werner, <i>Bell inequalities and entanglement</i>, (3) 1</p> <p>K. Whaley, see J. Kempe</p> <p>A. White, see G. Milburn (II)</p> <p>C. Williams, see P. Echternach</p> <p>D. Wineland, see D. Kielpinski</p> <p>M. Wolf, see R. Werner</p> <p>W. Wootters, <i>Entanglement of formation &amp; concurrence</i>, (1) 27</p> <p>F. Yamaguchi, see T. Ladd</p> <p>Y. Yamamoto, see T. Ladd</p> <p>P. Zoller, see G. Giedke</p>
