

Author Index*, QIC Vol.2 (2002)

<p>A-G</p> <p>S. Aaronson, <i>Book review on "A New Kind of Science" by S. Wolfram</i>, (5) 410</p> <p>M. Abdel-Aty, <i>Quantum statistical properties in a single...</i>, (4) 272</p> <p>P. Alsing, <i>Lorentz Invariance of Entanglement</i>, (6) 487</p> <p>A. Ambainis, see B. Travaglione</p> <p>J. Beall, see M. Rowe</p> <p>A. Ben-Kish, see M. Rowe</p> <p>T. Beth (I), see P. Wocjan (I)</p> <p>T. Beth (II), see P. Wocjan (II)</p> <p>T. Beth (III), see D. Janzing (III)</p> <p>S. Braunstein (I), <i>Speed-up and entanglement in quantum ...</i>, (5) 399</p> <p>S. Braunstein (II), see K. Nemoto</p> <p>J. Britton, see M. Rowe</p> <p>V. Buzek, see M. Plesch</p> <p>A. Childs, <i>Finding cliques by quantum adiabatic evolution</i>, (3) 181</p> <p>J. Cirac, see W. Duer</p> <p>D. Cory, see R. Laflamme</p> <p>G. D'Ariano, <i>The quantum monty hall problem</i>, (5) 355</p> <p>H. de Riedmatten, <i>Creating high-dimensional time-bin entanglement using mode-locked lasers</i>, (6) 425</p> <p>B. DeMarco, see M.A. Rowe</p> <p>W. Duer, <i>Equivalence classes of non-local unitary operations</i> (3) 240</p> <p>S. van Enk (I), <i>On the classical character of control fields in ...</i>, (1) 1</p> <p>S. van Enk (II), <i>The quantum state of a laser field</i>, (2) 151</p> <p>T. Forcer, <i>Superposition, entanglement and quantum computation</i>, (2) 97</p> <p>E. Farhi, see A. Childs</p> <p>C. Fuchs, see S. van Enk (II)</p> <p>S. Furuichi, see M. Abdel-Aty</p> <p>K. Gerlach, see R. Lockhart</p> <p>R. Gill, see G. D'Ariano</p> <p>N. Gisin, see H. de Riedmatten</p> <p>J. Goldstone, see A. Childs</p> <p>V. Gorbachev, <i>Teleportation and dense coding via a multiparticle quantum channel of the GHZ-class</i>, (5) 367</p> <p>D. Gottesman, <i>Book review on "Introduction to Quantum Computation and Information" (eds. H-K Lo, S Popescu, and T Spiller)"</i> (2) 177</p> <p>F. Green, <i>Counting, fanout and the complexity of quantum ACC</i>, (1) 35</p> <p>S. Gutmann, see A. Childs</p>	<p>H-M</p> <p>M. Hayashi, <i>Simple construction of quantum universal ...</i>, (s) 519</p> <p>A. Hey, see T. Forcer</p> <p>S. Homer, see F. Green</p> <p>J. Hughes, see M. Rowe</p> <p>W. Itano, see M. Rowe</p> <p>E. Jane, <i>Purification of two-qubit mixed states</i>, (5) 348</p> <p>D. Janzing (I), see P. Wocjan (I)</p> <p>D. Janzing (II), see P. Wocjan (II)</p> <p>D. Janzing (III), <i>Quantum algorithm for measuring the eigenvalues of ...</i>, (3) 192</p> <p>D. Janzing (IV), <i>Quantum algorithm for measuring the energy of ...</i>, (3) 198</p> <p>B. Jelenkovic, see M.A. Rowe</p> <p>H. Jeong, <i>Entanglement purification of entangled coherent states</i>, (3) 208</p> <p>A. Karlsson, see R.V. Ramos</p> <p>E. Kashefi, <i>On quantum one-way permutations</i>, (5) 379</p> <p>M. Keyl, see D'Ariano</p> <p>M. Kim, see H. Jeong</p> <p>H. Kimble, see S. van Enk (I)</p> <p>P. Kok, <i>QIC webcorner update</i>, (2) 179</p> <p>P. Kok, <i>QIC webcorner update</i>, (3) 255</p> <p>P. Kok, <i>QIC webcorner update</i>, (s) 596</p> <p>N. Konno, <i>Limit theorems and absorption problems for...</i>, (s) 578</p> <p>B. Kummerer, see G. D'Ariano</p> <p>R. Laflamme, <i>NMR quantum info. processing and entanglement</i>, (2) 166</p> <p>C. Langer, see M. Rowe</p> <p>J. Larsson, <i>A practical trojan horse for Bell-inequality-based ...</i>, (6) 434</p> <p>J.I. Latorre, see Ll. Masanes</p> <p>D. Leibfried, see M.A. Rowe</p> <p>D. Leung, <i>Quantum vernam cipher</i>, (1) 14</p> <p>R. Lockhart, <i>Geometry and product states</i>, (5) 333</p> <p>H. Maassen, see D'Ariano</p> <p>I. Marcikic, see H. de Riedmatten</p> <p>Ll. Masanes, <i>Time-optimal Hamiltonian simulation and gate synthesis...</i>, (4) 285</p> <p>K. Matsumoto, see M. Hayashi</p> <p>V. Meyer, see M. Rowe</p> <p>G. Milburn, see P.M. Alsing</p> <p>A. Miyake, <i>Multipartite entanglement and hyperdeterminants</i>, (s) 540</p> <p>C. Moore, see F. Green</p>	<p>N-Z</p> <p>S. Nakamura (I), see M. Abdel-Aty</p> <p>M. Nakahara (II), see A. Nisakanen</p> <p>C. Negrevergne, see R. Laflamme</p> <p>K. Nemoto, <i>A simulated photon-number detector in quantum information processing</i>, (s) 556</p> <p>M. Nielsen, see B. Travaglione</p> <p>H. Nishimura, see E. Kashef</p> <p>A. Niskanen, <i>Optimal holonomic quantum gates</i>, (s) 560</p> <p>A. Pati, see S. Braunstein (I)</p> <p>M. Plesch, <i>Entangled graphs</i>, (s) 530</p> <p>C. Pollett, see F. Green</p> <p>R. Ramos, <i>Numerical analysis of entanglement properties...</i> (3) 222</p> <p>A. Rodichkina, see V. Gorbachev</p> <p>T. Rosenband, see M. Rowe</p> <p>D. Ross, see T. Forcer</p> <p>M. Rotteler, see P. Wocjan (II)</p> <p>M. Rowe, <i>Transport of quantum states and separation of ions in ...</i>, (4) 257</p> <p>T. Rudolph, see R. Spekkens</p> <p>M.M. Salomaa, see A. Nisakanen</p> <p>D Schlingemann, <i>Stabilizer codes can be realized as graph codes</i> (4) 307</p> <p>P. Smith, see T. Forcer</p> <p>R. Spekkens, <i>Optimization of coherent attacks in generalizations of...</i>, (1) 66</p> <p>A. Steane, <i>Quantum computer architecture for...</i>, (4) 294</p> <p>M. Steiner, see R. Lockhart</p> <p>B. Travaglione, <i>ROM-based computation: quantum vs ...</i> (4) 324</p> <p>A. Trubilko, see V. Gorbachev</p> <p>A. Ungar, <i>The density matrix for mixed state qubits and ...</i>, (6) 513</p> <p>V. Vedral, see E. Kashef</p> <p>G. Vidal, see Ll. Masanes</p> <p>L. Viola, see R. Laflamme</p> <p>M. Wadati, see A. Miyake</p> <p>R. Werner, see G. D'Ariano</p> <p>D. Wineland, see M. Rowe</p> <p>A. Winter, <i>Book review on "A First Course in Information Theory" by R. Yeung</i>, (6) 515</p> <p>H. Wiseman, see B. ravaglione</p> <p>P. Wocjan (I), <i>Simulating arbitrary pair-interactions by ...</i>, (2) 117</p> <p>P. Wocjan (II), <i>Universal simulation of Hamiltonians using...</i>, (2) 133</p> <p>H. Zbinden, see H. de Riedmatten</p> <p>A. Zhibiba, see V. Gorbachev</p>
