

AUTHORS INDEX of QIC Vol.8 (2008)

<p>A-H O.L. Acevedo <i>Exploring scalar quantum walks on Cayley ...</i> (1&2) 68 T. Aellen, see G. Temporao P. Aliferis <i>Accuracy threshold for postselected qtm computation</i> (3&4) 181 M. Amini, see H. Rahiminia J. Anders <i>Entangle and separability of quantum harmonic...</i> (3&4) 245 D. Bacon <i>How Clebsch-Gordan transform helps to solve...</i> (5) 438 N. de Beaudrap, <i>An extremal result for geometries in one-way ...</i> (5) 430 E.C. Behrman <i>Quantum algorithm design using dynamic learning</i> (1&2) 12 G. Bjork, see Y.-T. Chen S.L. Braunstein, see M. Owari S. Bravyi <i>The complexity of stoquastic local Hamiltonian problems</i> (5) 361 P. Busch <i>Approximate joint measurements of qubit ...</i> (8&9) 797 C.M. Caves, see K.K. Manne N.J. Cerf, see O.L. Acevedo J. Chen, see X.-M. Lu L. Chen <i>Entanglement of formation from optimal ...</i> (10) 965 Y.-T. Chen <i>Generation and detection of photonic qutrit states ...</i> (5) 386 Y.-X. Chen, see L. Chen Y. Chung, see D. Poulin J.I. Cirac, see D. Perez-Garcia S. Clark <i>Generalized Clifford groups and simulation of ...</i> (1&2) 106 H.-Y. Dai, see M. Zhang T. Decker, see P. Wocjan (II) D.P. DiVincenzo, see S. Bravyi U. Dorner <i>A quantum repeater based on decoherence free subspaces</i> (5) 468 M.R. Dowling <i>The geometry of quantum computation</i> (10) 861 J. Eisert, see D. Gross (II) J. Faist, see G. Temporao M. Feng (I), see X.L. Zhang M. Feng (II), see Z.-Y. Xu A.G. Fowler, see A.M. Stephens B. Furrow <i>A panoply of quantum algorithms</i> (8&9) 834 K.L. Gao, see X.L. Zhang D. Gavinsky <i>On the role of shared entanglement</i> (1&2) 82 M. Giovannini, see G. Temporao N. Gisin, see G. Temporao D. Gottesman, see P. Aliferis D. Gross (I) <i>The LU-LC conjecture, diagonal local operations ...</i> (3&4) 263 D. Gross (II) <i>Quantum margulis expanders</i> (8&9) 722 D. Gross (III) see G. McConnell A.W. Harrow <i>Quantum expanders from any classical Cayley ...</i> (8&9) 715 H.L. Haselgrovel <i>Trade-off between the tolerance of located and ...</i> (5) 399 A.S.M. Hassan <i>Separability criterion for multipartite quantum...</i> (8&9) 773</p>	<p>H-P M. Hayashi <i>Quantum measurements for hidden subgroup problems ...</i> (3&4) 345 J.P. Hayes, see K.N. Patel T. Heinosaari, see P. Busch W.K. Hensinger, see D. Hucul H. Heydari <i>Construction of entanglement witnesses...</i> (8&9) 791 D.-W. Hu, see M. Zhang D. Hucul <i>On the transport of atomic ions in linear and ...</i> (6&7) 501 M.-R. Hwang, see E.-L. Jung G. Ivanyos (I) <i>Constructions for quantum computing with ...</i> (5) 411 G. Ivanyos (II) <i>On solving systems of random linear disequations</i> (6&7) 579 D. Jaksch, see U. Dorner D. Janzing, see P. Wocjan (II) S.P. Jordan, see P.W. Shor (I) A. Kawachi, see M. Hayashi Y. Kawano, see Y. Nakajima A. Klein, see U. Dorner N. Kunihiro, see Y. Takahashi H. Kobayashi, see M. Hayashi L.C.L. Hollenberg, see A.M. Stephens P.S. Joag, see A.S.M. Hassan R. Jozsa, see S. Clark E.-L. Jung <i>Three-qubit Groverian measure</i> (10) 925 O. Kern <i>Improved one-way rates for BB84 and 6-state protocols</i> (8&9) 756 P. Kumar, see E.C. Behrman A.W. Leung <i>Entanglement purification with two-way classical ...</i> (3&4) 311 N. Linden, see S. Clark P. van Loock, see P.P. Rohde (I) X.-M. Lu <i>Matrix rearrangement approach for entangling ...</i> (6&7) 671 V. Makarov <i>Faked states attack using detector efficiency mismatch...</i> (6&7) 622 K.K. Manne <i>Entanglement of formation of rotationally symmetric...</i> (3&4) 295 I.L. Markov, see K.N. Patel G. McConnell <i>Efficient 2-designs from bases exist</i> (8&9) 734 G. Milburn <i>Book review</i> (8&9) 860 C. Monroe, see D. Hucul W.J. Munro, see P.P. Rohde (I) M. Murao, see M. Owari A.B. Nagy, see G. Ivanyos (I) Y. Nakajima <i>Efficient quantum circuits for approximating Jones ...</i> (5) 489 K. Nemoto (I), see M. Owari K. Nemoto (II), see P.P. Rohde (I) M. Van den Nest, see D. Gross (I) M.A. Nielsen, see M.R. Dowling R. Oliveira (I), see S. Bravyi R. Oliveira (II) <i>The complexity of quantum spin systems on ...</i> (10) 900 S. Olmschenk, see D. Hucul M. Owari <i>Epsilon-convertibility of entangled states and ...</i> (1&2) 30 D. Park, see E.-L. Jung K.N. Patel <i>Optimal synthesis of linear reversible circuits</i> (3&4) 282</p>	<p>P-Z M. Pei, see N. de Beaudrap D. Perez-Garcia <i>PEPS as unique ground states of local ...</i> (6&7) 650 M. Planat <i>On the Pauli graphs on N-qudits</i> (1&2) 127 D. Poulin <i>On the iterative decoding of sparse quantum codes</i> (10) 986 J. Preskill, see P. Aliferis J. Rabchuk, see D. Hucul H. Rahiminia <i>On separability of graphs with some entangled edges</i> (6&7) 664 T.C. Ralph, see P.P. Rohde (I) J.M. Renes, see O. Kern P.P. Rohde (I) <i>Practical effects in the preparation of cluster states ...</i> (1&2) 53 P.P. Rohde (II), see H.L. Haselgrove J. Roland, see O.L. Acevedo L. Ronyai, see G. Ivanyos M. Saniga, see M. Planat H. Sekigawa, see Y. Nakajima P.W. Shor (I), see A.W. Leung P.W. Shor (II) <i>Estimating Jones polynomials is a complete ...</i> (8&9) 681 J. Skaar, see V. Makarov J.E. Steck, see E.C. Behrman A.M. Stephens <i>Universal fault tolerant quantum computation on ...</i> (3&4) 330 Y. Takahashi <i>A fast quantum circuit for addition with few qubits</i> (6&7) 636 L. Tamaryan, see E.-L. Jung S. Tamaryan, see E.-L. Jung S. Tanzilli, see G. Temporao G. Temporao <i>Feasibility study of free-space quantum key ...</i> (1&2) 1 B.M. Terha (I), see S. Bravyi B.M. Terhal (II), see R. Oliveira (II) F. Verstraete, see D. Perez-Garcia K.A. Walsh, see E.C. Behrman X. Wang, see X.-M. Lu J. Watrous <i>Distinguishing quantum operations having few ...</i> (8&9) 819 J. von der Weid, see G. Temporao A. Winter, see J. Anders K. Wirthmuller <i>Homological invariants of stabilizer states</i> (6&7) 595 P. Wocjan (I) <i>The Jones polynomial: quantum algorithms and ...</i> (1&2) 147 P. Wocjan (II) <i>Measuring 4-local qubit observables could ...</i> (8&9) 741 M.M. Wolf, see D. Perez-Garcia R. de Wolf <i>A note on quantum algorithms and...</i> (10) 943 Z.-Y. Xu <i>Universal quantum computation with ...</i> (10) 977 Y. Yang, see X.-M. Lu J. Yard, see P. Wocjan (I) M. Yeo, see D. Hucul M. Zhang <i>On impact of a priori classical knowledge of...</i> (10) 951 W.-M. Zhang, see Z.-Y. Xu X.L. Zhang <i>Universal quantum computation with electronic...</i> (1&2) 96 Z.-T. Zhou, see M. Zhang H. Zibinden, see G. Temporao</p>
